

University Police

Emergency Management

AppStateALERT is the University's system to notify faculty, staff, and students in the event that an emergency occurs. Emergency messages are sent to cell phones via text and voice, in addition to a campus e-mail. You are not automatically enrolled into the AppStateALERT system, so you must register to receive important emergency messages. You may register by going to:

www.emergency.appstate.edu

In the event of an emergency, all information will be posted to this emergency website.
